

Attachment for SVE Truck

SVE Truck Attachments - Svetruck initiated the company in the year 1977 with a clear idea of what particular sort of business they wanted to be and what kind of merchandise they wished to produce. They designed a service-friendly, reliable and durable forklift. Svetruck specializes in manufacturing forklifts which allow the operator to be able to operate well within demanding surroundings. Svetruck believes that being capable of performing safe and successful material handling in the best way possible really helps in order to contribute to a positive work environment.

Home to their manufacturing facility in Ljungby, they manufacture machines like for example container handlers, forklifts and log-stackers. To this date Svetruck is proudly supplying forklifts and various forklifts to all their worldwide clients.

Focused on the future, Svetruck remains fully dedicated to safeguarding their excellent reputation of manufacturers of reliable and durable forklifts. Their basic method to high quality, solid experience and over 30 years of expertise in the area, means they can offer people brilliant solutions for all their material handling needs.
