

## Aerial Work Platforms

Aerial Work Platforms - There are many accessories intended for forklifts which could be used so as to help expand the functionality of your forklift and allow you to pick up things, handle materials with greater ease or to finish clean-up tasks.

Some accessories were specially meant for the forks themselves. For instance, fork extensions could be used whenever you require much more fork length, that increases lifting capacity. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are one more variety utilized if transferring rolled material so as to make certain it does not roll off of the traditional flat forks.

Lifting attachments could be pivoting and telescoping crane attachments. They come in many kinds. These attachments are often utilized for transferring poles, lumber, metal bars or whatever sort of bulky things. Additional accessories like various kinds of hook plates and hooks are existing to be able to pick up items utilizing a chain or sling. Slab lifters and magnetic lifters are other items which can be used with hook accessories. Slab lifters are specialized attachments that are utilized for picking up a variety of materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which connect to your lift truck in order to make transporting rolls of carpet much easier. The accessory connects onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are several other types of forklift attachments that could be utilized for facility maintenance such as snow blades. These blades connect to front end loaders and can transport materials like for instance dirt, soil and snow. Other popular cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck forks hook onto for sweeping large spaces like for example warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up fast and easy.

Material spreaders are other accessories utilized on lift trucks. These spreaders are useful for a variety of applications like for instance spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Another optional lifting accessory are work platforms. These could be used by lots of different companies day by day. Platforms may vary in size from 36" x 36" to up to 60" x 60". Some models may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location using the lift truck. Larger platform units have added space for employees to carry tools and other essential things intended for the task. Usually work platforms are made of poly material or steel.
