

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international organization consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Equipment and Machine Instruments and Mechanization Systems.

Their United States partner, Doosan Infracore America Corporation, stationed in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer desires.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. What's more, there are more than 90 independent sellers moving forklift equipment and materials handling equipment. This system allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably includes 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various vehicle designs range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift company in the North American marketplace, due to their consistency in retaining a high degree of consumer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. lift Truck division stationed in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Product sales of these goods were originally targeted to state-run firms, large scale organizations, and the military. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Domestic lift truck business for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of substantial growth of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to respond to competitive pressures in the US materials handling industry. This project greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a new plant which helped set up the company for the fabrication of high end added-value products suited for export. In 1993, the corporation had a global sales network and started exporting designs they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
